ABA and Twin head Blown Film Extrusion

POLYSTAR's blown film extrusion division focuses specifically on ABA 3 layer and various types of mono layer blown film extrusion machines. Our ABA line allows bag producers to use a high percentage of recycled material or CaCO₃ in the middle layer of the film, which significantly reduces material cost while producing stronger film with higher resistance.

POLYSTAR's **twin (two) head blown film machine** is very popular amongst bag producers of T-shirt, supermarket, flat, garbage and bottom-sealed bags (ranges from 200~600mm in width, in HDPE and LDPE). This high speed line provides a much faster return on investment comparing to a blown film machine equipped with IBC. In the double head blown film machines, one can reach much higher output even when producing at small film width. It is the perfect choice for bag makers who are looking for less expensive machines with higher output and good film quality.

Simple Operation - Operator and Maintenance Friendly

SAMYAK BAZZAR PVT. LTD,

Trading of Plastics Raw Material (Imported & Domestic)

Samyak House, Opp. Arpan Flates, Nr. Shantivan Bus Stop, Narayan Nagar Road, Shantivan, Paldi, Ahmedabad - 380007.

✚ Success Story:

World-class Producer of Plastic Recycling Machine

- ❖ More than 3,500 machines have been installed since 1988
- ❖ **Satisfied customers in 103 countries** in Asia, Africa, Europe, Middle East & America
- ❖ Cooperates with small, medium-sized companies to industrial leaders
- ❖ 170 Recycling machines have been sold to date since K show (Germany) in 2016
- ❖ More than 300% growth in revenue since 2013

✚ After Sale Service:

A main focus of POLYSTAR has always been customer service, which continues to be a key factor in POLYSTAR's high customer retention rate. In addition to online trouble-shooting, POLYSTAR makes sure that all of its distributors are equally service-oriented with skilled engineering teams that provide installation, after sales services, and maintenance in their markets. POLYSTAR provides services worldwide to all economic sectors including packaging, plastic production, recycling, environmental, construction, agricultural, and governmental sectors.
